Sharpe Ratio: 0.80

Standard Deviation: 17.58

Beta: 1.15

(Based on monthly returns over the past 3 years Mibor has been assumed as the risk-free rate of return)

Portfolio Turnover: 1.24

Fund Manager's Comment: Scheme has witnessed changes in its sector positioning mirroring the evolving economic situation in India. There is realignment in the weights towards the sectors considered to be significantly benefiting from the cyclical changes as well fall in commodities prices. Scheme will remain oriented towards absolute ideas to generate its Alpha returns in the portfolio and it remains positive on the other investment opportunities in defence, railway and infrastructure and construction themes. Scheme has bias towards high quality large cap stocks with overweight position in BFSI sector. Sustained regulatory change and positive policy frame work coupled with economic recovery should prove to be tailwind for the stocks in the sector. Scheme witnessed inclusion of many small cap. Asset allocation has been increased towards the auto sector on the back increasing volumes and potential normal monsoon; this has been done partly allocating re allocation of gains from cement sector.

Standard Deviation: 13.57

Beta: 1.03

(Based on monthly returns over the past 3 years Mibor has been assumed as the risk-free rate of return)

Portfolio Turnover: 1.82

Fund Manager's Comment: Portfolio composition has decisively moved towards absolute ideas with growth tailwinds. This is despite heavy composition of defensives in benchmark Index. This has caused increase of portfolio beta. Portfolio is underweight in FMCG, Pharma and IT sector. Re-alignment in the portfolio has been due to potential broad based recovery in the economy and consequent benefit to Industrial companies in the economy.

Portfolio Turnover: 1.94

Fund Manager's Comment: True to its mandate, the portfolio maintained its character for infrastructure themes. The recent effort in pushing massive infrastructure project has induced positive sentiments in the sector. The significant policy reforms in coal, gas and power sector is providing significant boost to the sectors future outlook. Infrastructure remains an important pillar of India growth story and we have strong conviction of come back in near future. Sector has been under pressure since last few years due to multiple factors. We expect the sector to outperform in the coming times. There is no major change in portfolio construction.

(Based on monthly returns over the past 3 years Mibor has been assumed as the risk-free rate of return)

Portfolio Turnover: 1.15

Fund Manager's Comment: Scheme has witnessed changes in its sector positioning mirroring the evolving economic situation in India. There is realignment in the weights towards the sectors considered to be significantly benefiting from the cyclical changes as well fall in commodities prices. Banks have seen cut in the weights and oil and gas has seen an increase. Media and Entertainment sector has seen increase in weight and capital goods and engineering has seen a cut due to lack of revival in private sector capex programme. Scheme will remain oriented towards absolute ideas to generate its Alpha returns in the portfolio and it remains positive on the other investment opportunities in defence, railway and infrastructure and construction themes.

Pursuant to payment of dividend, the NAV of the Scheme will fall to the extent of the dividend and statutory levy, if any. Past performance may or may not be sustained in the future.

All dividends are on face value of ₹10 per unit. For complete details of the dividend declared please log on to www.taurusmutualfund.com

As on 31st October 2016

TAURUS DISCOVERY FUND - (AN OPEN-ENDED EQUITY FUND WITH MID CAP AND SMALL CAP FOCUS)

SCHEME FEATURES

Investment Objective

The primary objective of the Scheme is to identify and select low priced stocks through price discovery mechanism, which would broadly include:

- To capitalise on available opportunity on growth potential offered by undervalued penny stocks.
- Such stocks being low priced and if dividend paying, decent dividend yield will give desired cushion in the volatile capital market.
- Lower side risk is minimum in such investments.
- Many of such cases where investment will be made, may be turnaround cases, therefore, greater potential for improvement in NAV.

Fund Manager's Comment: We believe investment themes have expanded in India since the new government has come into the power and focussed on development and governance through its various reform agenda i.e. Defence, Railways, Make in India, Swachh Bharat, Digital India, Tourism, Namami Gange and other specific initiatives. We are also enthused by the Governments effort to bring efficiency, transparency, governance in the business. We have positioned our portfolio across these themes and companies that will have sustainable growth in coming years. We see upside to these ideas to have much larger than some of the large well run efficient companies. Portfolio has added some tactical position in some good business with stressed out valuations.

Fund Manager's Comment: Portfolio has maintained a positive bias on large cap banks, especially Private Banks, given their larger link to benign retail sector. In PSU banks the exposure has been restricted to larger players where the Govt support is likely to come faster and valuation upside is likely. Portfolio strategy is to build companies capable of delivering absolute alphas in volatile market recovery. Scheme has identified few more NBFCs companies to take advantage of relatively better growth rate in retail assets and falling interest rate.

Fund Manager's Comment: System liquidity drained during the month with average liquidity fading from a surplus of Rs. 36,477 crore during September to a surplus of Rs. 2,794 crore in October. RBI infused average liquidity via Repo under LAF window worth Rs 8,650 crore during October compare to Rs. 6,000 crore a month ago. During the month RBI also announced OMO purchase of Rs. 10,000 crs and G-sec buy back of Rs. 20,000 crs at the shorter end of curve in order to boost liquidity. One year CD closed the month at 6.93%, down ~18bps from last month's closing. Liquidity deficit may continue during November on account of FCNR outflow however proactive measures by government like OMO, G-Sec Buyback may ease up the liquidity tightness.

The Assets under Management (AUM) increased significantly during October. We intend to maintain a judicious balance between bank and non-bank assets taking into account the risks embedded in the various asset classes.

DIVIDEND HISTORY

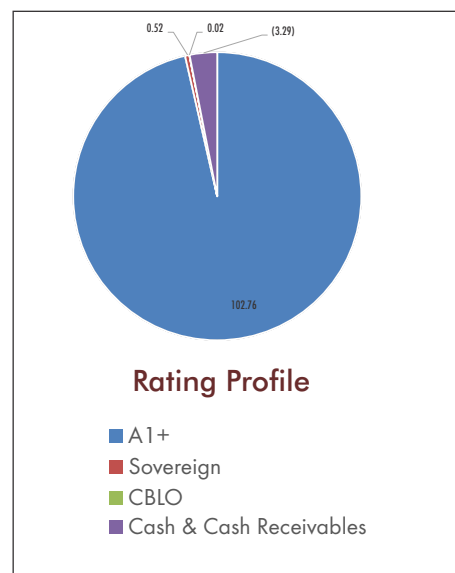

The scheme has not declared any dividend in last three months

Fund Manager's Comment: Liquidity condition went into deficit mode during the month and at the end of month system liquidity reached to a deficit of Rs. 26,644 crore compare to a surplus of Rs. 96,615 crore at the start of the month. During the month RBI also announced OMO purchase of Rs. 10,000 crs and G-sec buy back of Rs. 20,000 crs at the shorter end of curve in order to boost liquidity. Three-month CD closed the month at 6.58%, Down ~3bps from last month's closing. Liquidity deficit may continue during November on account of FCNR outflow however proactive measures by government like OMO, G-Sec Buyback may ease up the liquidity tightness.

We intend to maintain low average maturity in anticipation of rise in short term rates. However, we may tweak the maturity depending upon the liquidity situation maintaining a judicious balance between bank and non-bank assets.

Modified Duration : 0.06 years

Fund Manager's Comment: Bonds have rallied significantly post policy, 10yr benchmark G-Sec touched the low of 6.80% compare to 6.96% at the end of September but bounced back and traded in range of 6.86%-6.89% on account of uptick in US treasury yields and weakness in rupee. As per minutes of Fed September policy three monetary policymakers dissented from the decision of status quo and preferring a rate hike which raised the scope for a rate hike in near term. Market participants will closely track RBI Monetary policy and domestic inflation data.

Our bias would be to balance duration and accrual strategy for efficient performance. We may tweak the scheme maturity depending on our regular prognosis. We would continue to have a judicious mix of assets in order to deliver consistent optimal performance.

Quantitative Data

Portfolio Yield : 7.28%

Average Maturity Period: 0.09 years

Modified Duration : 0.09 years

Fund Manager's Comment: 10Yr old benchmark 7.59% G-Sec 2026 closed the month at 6.89% vis-à-vis 6.96% a month ago. The new 10 yr. benchmark 6.97% G-Sec 2026 closed the month at 6.79% vis-à-vis 6.82% a month ago. The domestic rally was initially triggered after a rate cut of 25 bps by RBI but yields bounced back taking cues from the uptick in US treasury yields and weakness in rupee. As per minutes of Fed September policy three monetary policymakers dissented from the decision of status quo and preferring a rate hike which raised the scope for a rate hike in near term. India registered a fiscal deficit of 40,168 crore during September 2016. The fiscal deficit in the first six months widened to 4.48 lakh crore which is 83.9 per cent of Governments total Budget estimate of Rs 5.34 lakh crore for 2016-17 as against 68.1 per cent in the corresponding period a year ago. Bond market will trade in a narrow range with bearish bias in anticipation of major global events due next month such as FOMC Meet, Non-Farm Payroll data, U.S. presidential election. Apart from this market will closely watch domestic CPI, GDP 2Q data. We will continue to balance duration and accrual strategy for efficient performance.

Nifty 50 (% IRR)	8.47	16.79

How to read Factsheet

Fund Manager : An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription : This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount : This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity : The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP : SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs. 500 every 15th of the month in an equity fund for a period of three years.

NAV : The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark : A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10 - Year Gsec.

Entry Load : A Mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent.

Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs. 101

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load : Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit Load. For instance if the NAV is Rs. 100 and the exit load is 1% the investor will receive Rs. 99.

Modified Duration : Modified duration is the price sensitivity and the percentage change in price for a unit change in yield

Standard Deviation : Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharp Ratio : The Sharp Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta : Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM : AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings : The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme : The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile : Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the rating. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Tax Benefits Dividend distributed by the Scheme (s) are free from Income - tax in the hands of Investors. The additional Income Tax on distribution of dividend by a debt fund (including money market or a liquid fund) to an individual / HUF shall be payable at the rate of 28.84%* and at the rate of 34.608%* to any other investor for FY 2015 - 16. With effect from 01/10/2014, Dividend Distribution Tax would apply on gross dividend instead of net dividend. Units of the Scheme(s) are not subject to Wealth-tax and Gift-tax. Unit holders are required to pay Securities Transaction Tax (STT) at the rate of 0.001% at the time of redemption /switch-out of units of an equity oriented fund.

*Including applicable surcharge, education cess and secondary and higher education cess.

Investors should be aware that the fiscal rules/tax laws may change and there can be no guarantee that the current tax position may continue indefinitely. In view of individual nature of tax consequences, each investor is advised to consult his/her own professional tax advisor.

Direct Plan was introduced for all schemes with effect from January 1, 2013
