There would be no variation between the intended portfolio allocation and the final portfolio, subject to the following and except as permitted by SEBI from time to time:

- Deviation of the asset allocation in favour of higher rated instruments within the same instrument category to improve the portfolio credit quality.
- In case CPs/ NCDs of desired credit quality are not available or the Fund Manager is of the view that the risk reward analysis of such instruments are not in the best interest of the Unit holders, the Plan(s) may invest in highest rated CDs viz. A1 +/ TREPS/ Reverse Repos/ T-Bills.
- At the time of building the portfolio post NFO and towards the maturity of the Plan, the monies may be kept in cash and invested largely in cash equivalents/ liquid/ money market schemes/ shorter tenor CDs.
- During the tenure of the Plan(s), the above allocation may vary due to instances like (a) coupon inflow; (b) the instrument is called or bought back by the issuer (c) in anticipation of any adverse credit event. In case of such deviations, the Plan(s) may invest in highest rated CDs viz. A1 +/ TREPS/ Reverse Repos / T-Bills. Such deviation may continue till maturity of the Plan(s), if suitable CPs / NCDs of desired credit quality are not available.

(v) The above allocation may vary during the duration of the Scheme in the following event:

- (a) due to occurrence of any adverse credit events such as rating downgraded/default;
- (b) if due to market action the values of debt/money market instruments appreciate/ depreciate.

In case of such event, fund manager may rebalance the portfolio or continue to hold the instrument in the portfolio in the best interest of the unit holder's.

In case of any deviation from floors and ceilings of the intended allocation (%) against each sub asset class/ ratings indicated in the above table and for the deviations mentioned under point (i) to (v), the Fund Manager will rebalance the same within the period as specified in the table below. Further, in case the portfolio is not rebalanced, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action.

For maturity more than 3 months but upto 6 months	within 15 business days
For maturity more than 6 months	within 30 business days

For more details please refer to the Scheme Information Document.

## 5. Investment Strategy

The primary objective of the Plan(s) under the Scheme is to generate income through investments in Debt / Money Market Instruments and Government Securities maturing on or before the maturity date of the respective Plan(s). The Scheme has the flexibility to invest in a range of debt instruments and would seek to minimise interest rate risk while avoiding undue credit risks.

The Scheme would make investment in securities in the investment universe based on market spreads and liquidity, so as to match the investment horizon with the scheme maturity. The investments would be based on interest rate expectations arising out of macroeconomic analysis. This includes analysis of inflation data and trends in macro variables such as credit growth, liquidity, money supply growth, fiscal numbers and the global interest environment.

**Though every endeavor will be made to achieve the objective of the Scheme, the AMC/Sponsors/ Trustee do not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.**

## 6. Risk Profile of the Scheme

The specific risk factors related to the Scheme include, but are not limited to the following:

### (i) Scheme Specific Risk factors:

The specific risk factors include, but are not limited to the following:

#### ■ Risk factors associated with close-ended schemes

- A close-ended scheme endeavors to achieve the desired returns only at the scheduled maturity of the Plan(s) under the Scheme. Investors who wish to exit/redeem before the scheduled maturity date may do so through the stock exchange mode. For the Units listed on the exchange, it is possible that the market price at which the Units are traded may be at a discount to the NAV of such Units. Hence, Unit holders who sell their Units in a Plan(s) under the Scheme prior to maturity may not get the desired returns. Moreover, given the nature of the Scheme, the AMC may be required to liquidate the equity portfolio and the proceeds may be kept in cash and invested largely in cash equivalents/money market instruments towards the Maturity/Final Redemption date and to that extent these investments made may not be in line with the asset allocation pattern.
- A close ended Scheme comes to the end at the scheduled maturity. On the scheduled maturity date, investors carry the risk that the value of underlying portfolio securities on the maturity date of the Plan(s) under the Scheme could get impacted by unfavourable market conditions and/or company specific events, which could lead to lower than desired returns.
- Treatment and disposal of illiquid securities or securities classified as default at the time of maturity / closure of schemes shall be in terms of SEBI circular No. MFD/CIR/ 05/432/2002 dated June 20, 2002 read with SEBI circular No. SEBI/HO/ IMD/ DF4/ CIR/P/ 2019/ 102 dated September 24, 2019 as may be amended from time to time which states as under: "In case of close-ended schemes, some of the investments made by Mutual Funds may become default at the time of maturity of schemes. Further, at the time of winding up of a scheme, some of the investments made by Mutual Funds may become default or illiquid. In due course of time i.e. after the maturity or winding up of the schemes, such investments may be realised by the Mutual Funds. It is advised to distribute such amount, if it is substantial, to the concerned investors. In

case the amount is not substantial, it may be used for the purpose of investor education. The decision as to the determination of substantial amount shall be taken by the Trustees of Mutual Funds after considering the relevant factors including number of investors, amount recovered, cost of transferring funds to investors; among others."

### (ii) Risk factors associated with investing in Fixed Income Securities

- The Net Asset Value (NAV) of the Scheme, to the extent invested in Debt and Money Market instruments, will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- Money market instruments, while fairly liquid, lack a well developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
- Investments in money market instruments involve credit risk commensurate with short term rating of the issuers.
- Investment in Debt instruments are subject to varying degree of credit risk or default (i.e. the risk of an issuer's inability to meet interest or principal payments on its obligations) or any other issues, which may have their credit ratings downgraded. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic or and political conditions specific to an issuer, all of which are factors that may have an adverse impact on an issuer's credit quality and security values. This may increase the risk of the portfolio. The Investment Manager will endeavour to manage credit risk through in-house credit analysis.
- Government securities where a fixed return is offered run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. The new level of interest rate is determined by the rates at which government raises new money and/or the price levels at which the market is already dealing in existing securities. The price-risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.
- Different types of fixed income securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the Schemes' risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher level of risk than Government securities. Further even among corporate bonds, AAA rated bonds are comparatively less risky than AA rated bonds.
- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated securities offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute level of risk of the portfolio.
- As zero coupon securities do not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio. Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are generally more volatile than the market prices of securities that pay interest periodically.
- **Prepayment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the Scheme to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the Scheme.
- **Reinvestment Risk:** This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- **Settlement risk:** Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are uninvested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause

the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well developed and liquid secondary market for debt securities, may result at times in potential losses to the Scheme in the event of a subsequent decline in the value of securities held in the Scheme's portfolio.

### (iii) Risk factors associated with Repo in Corporate Debt Securities

In repo transactions, also known as a repo or sale repurchase agreement, securities are sold with the seller agreeing to buy them back at later date. The repurchase price should be greater than the original sale price, the difference effectively representing interest. A repo in corporate debt securities is economically similar to a secured loan, with the buyer receiving corporate debt securities as collateral to protect against default. Some of the risks associated with repo in corporate debt are given below:

**Counterparty Risk:** Counterparty risk refers to the inability of the seller to meet the obligation to buy back securities at the contracted price on the contracted date. In case of over the counter (OTC) repo trades, the investment manager will endeavour to manage counterparty risk by dealing only with counterparties having strong credit profiles. Also, the counter-party risk is to an extent mitigated by taking collateral equivalent in value to the transaction after knocking off a minimum haircut on the intrinsic value of the collateral. In the event of default by the repo counterparty, the scheme shall have recourse to the corporate debt securities. In case the repo transaction is executed on exchange platform approved by RBI/SEBI, the exchange may also provide settlement guarantee.

**Collateral Risk:** Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations. This risk can be partly mitigated by restricting participation in repo transactions only in corporate debt securities which are approved by credit risk team. Additionally, to address the risk related to reduction in market value of corporate debt security held as collateral due to credit rating downgrade, the repo contract can incorporate either an early termination of the repo agreement or call for fresh margin to meet the minimum haircut requirement or call for replacement of security with eligible security. Moreover, the investment manager may apply a higher haircut on the underlying security than required as per RBI/SEBI regulation to adjust for the illiquidity and interest rate risk on the underlying instrument. To mitigate the risk of price reduction due to interest rate changes, the adequacy of the collateral can be monitored on a daily basis by considering the daily market value & applying the prescribed haircut. The fund manager or the exchange can then arrange for additional collateral from the counterparty, within a prespecified period. If the counterparty is not able to top-up either in form of cash / collateral, it would tantamount to early termination of the repo agreement, and the outstanding amount can be recovered by sale of collateral.

### (iv) Risk factors associated with investment in Tri-Party Repo

The Mutual Fund is a member of securities segment and Triparty Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL).

As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus, the Scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/ default losses of another member by CCIL, as a result the Scheme may lose an amount equivalent to its contribution to the default fund.

### (v) Risks associated with Investing in Structured Obligation (SO) & Credit Enhancement (CE) rated securities:

The risks factors stated below for the Structured Obligations & Credit Enhancement are in addition to the risk factors associated with debt instruments.

- Credit rating agencies assign CE rating to an instrument based on any identifiable credit enhancement for the debt instrument issued by an issuer. The credit enhancement could be in various forms and could include guarantee, shortfall undertaking, letter of comfort, etc. from another entity. This entity could be either related or non-related to the issuer like a bank, financial

institution, etc. Credit enhancement could include additional security in form of pledge of shares listed on stock exchanges, etc. SO transactions are asset backed/ mortgage backed securities, securitized paper backed by hypothecation of car loan receivables, securities backed by trade receivables, credit card receivables etc. Hence, for CE rated instruments evaluation of the credit enhancement provider, as well as the issuer is undertaken to determine the issuer rating. In case of SO rated issuer, the underlying loan pools or securitization, etc. is assessed to arrive at rating for the issuer.

- **Liquidity Risk:** SO rated securities are often complex structures, with a variety of credit enhancements. Debt securities lack a well-developed secondary market in India, and due to the credit enhanced nature of CE securities as well as structured nature of SO securities, the liquidity in the market for these instruments is adversely affected compared to similar rated debt instruments. Hence, lower liquidity of such instruments, could lead to inability of the scheme to sell such debt instruments and generate liquidity for the scheme or higher impact cost when such instruments are sold.
- **Credit Risk:** The credit risk of debt instruments which are CE rated is based on the combined strength of the issuer as well as the structure. Hence, any weakness in either the issuer or the structure could have an adverse credit impact on the debt instrument. The weakness in structure could arise due to inability of the investors to enforce the structure due to issues such as legal risk, inability to sell the underlying collateral or enforce guarantee, etc. In case of SO transactions, comingling risk and risk of servicer increases the overall risk for the securitized debt or assets backed transactions. Therefore apart from issuer level credit risk such debt instruments are also susceptible to structure related credit risk.

### (vi) General Risk Factors

- Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in permitted unlisted securities that offer attractive returns. This may increase the risk of the portfolio.
- Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Units of the Scheme can go up or down because of various factors that affect the capital markets in general.
- As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme. In view of the above, the Trustee has the right, in its sole discretion, to limit redemptions (including suspending redemptions) under certain circumstances, as described in the SID.
- At times, due to the forces and factors affecting the capital market, the Scheme may not be able to invest in securities falling within its investment objective resulting in holding the monies collected by it in cash or cash equivalent or invest the same in other permissible securities / investments amounting to substantial reduction in the earning capability of the Scheme. The Scheme may retain certain investments in cash or cash equivalents for its day-to-day liquidity requirements.
- The Scheme at times may receive large number of redemption requests, leading to an asset-liability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in higher exposure to lower yield instruments.
- Investment strategy to be adopted by the Scheme may carry the risk of significant variance between the portfolio allocation of the Scheme and the Benchmark particularly over a short to medium term period.
- Performance of the Scheme may be affected by political, social, and economic developments, which may include changes in government policies, diplomatic conditions, and taxation policies.
- While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Scheme incurring losses till the security is finally sold.

### (vii) Risk factors associated with Derivatives for hedging purposes only

- The AMC, on behalf of the Scheme may use various derivative products, from time to time, in an attempt to protect the value of the portfolio and enhance Unit holders' interest. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with

stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Other risks include, the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

- **Credit Risk:** The credit risk in derivative transaction is the risk that the counter party will default on its obligations and is generally low, as there is no exchange of principal amounts in a derivative transaction.
- **Market Risk:** Market movements may adversely affect the pricing and settlement of derivatives.
- **Illiquidity risk:** This is the risk that a derivative cannot be sold or purchased quickly enough at a fair price, due to lack of liquidity in the market.
- **Additional Risk viz. Basis Risk associated with imperfect hedging using Interest Rate Futures (IRF):** The imperfect correlation between the prices of securities in the portfolio and the IRF contract used to hedge part of the portfolio leads to basis risk. Thus, the loss on the portfolio may not exactly match the gain from the hedge position entered using the IRF.

#### (viii) Risk factors associated with investing in Securitised Debt

The Risks involved in Securitised Papers described below are the principal ones and does not represent that the statement of risks set out hereunder is exhaustive.

##### • Limited Liquidity & Price Risk

There is no assurance that a deep secondary market will develop for the Certificates. This could limit the ability of the investor to resell them.

##### • Limited Recourse, Delinquency and Credit Risk

The Credit Enhancement stipulated represents a limited loss cover to the Investors. These Certificates represent an undivided beneficial interest in the underlying receivables and do not represent an obligation of either the Issuer or the Seller or the originator, or the parent or any affiliate of the Seller, Issuer and Originator. No financial recourse is available to the Certificate Holders against the Investors' Representative. Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Investor Payouts to the Certificate Holders may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of a Obligor to repay his obligation, the Servicer may repossess and sell the Asset. However many factors may affect, delay or prevent the repossession of such Asset or the length of time required to realise the sale proceeds on such sales. In addition, the price at which such Asset may be sold may be lower than the amount due from that Obligor.

##### • Risks due to possible prepayments and Charge Offs

In the event of prepayments, investors may be exposed to changes in tenor and yield. Also, any Charge Offs would result in the reduction in the tenor of the Pass Through Certificates (PTCs).

##### • Bankruptcy of the Swap Bank

If the Swap Bank, becomes subject to bankruptcy proceedings then an Investor could experience losses or delays in the payments due under the Interest Rate Swap Agreement.

##### • Risk of Co-mingling

With respect to the Certificates, the Servicer will deposit all payments received from the Obligors into the Collection Account. However, there could be a time gap between collection by a Servicer and depositing the same into the Collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the Loan Agreements may not be segregated from other funds of originator. If originator in its capacity as Servicer fails to remit such funds due to Investors, the Investors may be exposed to a potential loss.

#### (ix) Risk factors associated with Creation of Segregated Portfolio

In the event of creation of Segregated Portfolio in case of a Credit Event, investors' investments may be subject to following risks:

- Investor holding units of Segregated Portfolio may not able to liquidate their holding till the time recovery of money from the issuer.

- Trading in Units of the respective Plan(s) on the Exchange(s) may be halted because of market conditions or for reasons that in view of Exchange

Authorities or SEBI, trading in Units of the respective Plan(s) is not advisable. - The Units of the respective Plan(s) may trade above or below their NAV. The NAV of the respective Plan(s) will fluctuate with changes in the market value of Plan's holdings. The trading prices of Units of the respective Plan(s) will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the respective Plan(s).
- The Units will be issued in demat form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund on the maturity date / final redemption date will depend upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control.
- As the Units allotted under respective Plan(s) of the Scheme will be listed on the Exchange(s), the Mutual Fund shall not provide for redemption / repurchase of Units prior to maturity / final redemption date of the respective Plan(s).

#### (xi) Risk factors associated with processing of transaction through Stock Exchange Mechanism

The trading mechanism introduced by the Stock Exchange(s) is configured to accept and process transactions for mutual fund Units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognised Stock Exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing /settlement, etc. upon which the Fund has no control. Moreover, transactions conducted through the Stock Exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized Stock Exchange(s).

### 7. Risk Mitigation Strategy

- Exposure to debt instruments, other than Sovereign exposures, would be diversified, comprising a number of issuers across various sectors. This shall aid in managing concentration risk and sector-specific risks.
- The investors cannot redeem/ Switch units under the Scheme directly with the Mutual Fund until the final redemption/ maturity date. Redemptions in the Scheme would also take place only at the maturity date. An interest rate scenario analysis would be performed on an on-going basis, considering the impact of the developments on the macro-economic front and the demand and supply of funds. Further to maintain the liquidity risk, the Scheme would keep the maturity of its assets on or before the maturity/ final redemption date of the scheme.
- A credit evaluation of each debt exposure would be undertaken. This would also consider the credit ratings given to the instrument by recognised rating agencies. Investments in debt / money market instruments would normally be undertaken in instruments that have been assigned high investment grade ratings by any of the recognised rating agencies. Unrated investments, if any, would require specific approval from a committee constituted for the purpose.

### 17. Prevention of Money Laundering

SEBI vide its circular reference number ISD/CIR/RR/AML/1/06 dated January 18, 2006 and other circulars issued from time to time, mandated that all intermediaries including Mutual Funds should formulate and implement a proper policy framework as per the guidelines on anti money laundering measures and also to adopt a Know Your Customer (KYC) policy.

The Investor(s) should ensure that the amount invested in the Scheme is through legitimate sources only and does not involve and is not designated for the purpose of any contravention or evasion of the provisions of the Income Tax Act, Prevention of Money Laundering Act (PMLA), Prevention of Corruption Act and / or any other applicable law in force and also any laws enacted by the Government of India from time to time or any rules, regulations, notifications or directions issued thereunder.

To ensure appropriate identification of the Investor(s) and with a view to monitor transactions for the prevention of money laundering, the AMC / Fund reserves the right to seek information, record investor's telephonic calls and or obtain and retain documentation for establishing the identity of the Investor(s), their beneficial ownership, proof of residence, source of funds, etc. It may re-verify identity and obtain any incomplete or additional information for this purpose.

The Fund, AMC, Trustee and their Directors, employees and agents shall not be liable in any manner for any claims arising whatsoever on account of freezing the folios/rejection of any application / allotment of Units or mandatory redemption of Units due to non compliance with the provisions of the PMLA, SEBI/AMFI circular(s) and KYC policy and / or where the AMC believes that transaction is suspicious in nature within the purview of the PMLA and SEBI/AMFI circular(s) and reporting the same to FIU-IND.

### 18. Know Your Customer (KYC) Compliance

#### a. KYC registered under KYC Registration Agency (KRA):

##### Units held in account statement (non-demat) form

It is mandatory for the Investors to quote the KYC Compliance Status of each applicant (guardian in case of minor) in the application and attach proof of KYC Compliance viz. KYC Acknowledgement Letter for all purchases/ switches/ redemptions/ registrations for Systematic Investment Plan (SIP)/ Systematic Transfer Plan (STP)/Flex STP/ Flexindex Plan/ Transfer of IDCW Plan Facility ("TIP Facility"). Applicants intending to apply for units through a Power of Attorney (PoA) must ensure that the issuer of the PoA and the holder of the PoA must mention their KYC Compliance Status and attach proof of KYC Compliance at the time of investment. For cases where the KYC status is 'Under Process'/ 'In-Progress', AMC may accept the subscription/switch transactions and process the same, but keep the units 'on hold' from any further transactions till KYC status is 'Verified'.

SEBI has introduced a common KYC Application Form for all the SEBI registered intermediaries. New investors are therefore requested to use the common KYC Application Form and carry out the KYC process including In-Person Verification (IPV) with any SEBI registered intermediaries including mutual funds. The KYC Application Forms are also available on our website [www.hdfcfund.com](http://www.hdfcfund.com). Existing KYC compliant investors of the Fund can continue the practice of providing KYC Acknowledgement Letter/ Printout of KYC Compliance Status downloaded from CDSL Ventures Ltd. (CVL) website ([www.cvlindia.com](http://www.cvlindia.com)) using the PAN at the time of investment.

Once the investor has done KYC with any SEBI registered intermediary, the investor need not undergo the same process again with the Fund. However, the Fund reserves the right to carry out fresh KYC of the investor in its discretion.

##### Units held in electronic (demat) form

For units held in demat form, the KYC performed by the Depository Participant of the applicants will be considered as KYC verification done by the Trustee / AMC. In the event of non compliance of KYC requirements, the Trustee/AMC reserves the right to freeze the folio of the investor(s) and effect mandatory redemption of unit holdings of the investors at the applicable NAV, subject to payment of exit load, if any.

For further details, please refer Section 'Know Your Customer (KYC) Compliance' under Statement of Additional Information available on our website [www.hdfcfund.com](http://www.hdfcfund.com)

SEBI required all the market intermediaries to update/upload KYC details of the new customer/investors (not KYC-KRA compliant) on CERSAI's online platform. Central KYC (CKYC) will store all the customer/investor information at one central server that is accessible to all the financial institutions. After opening a KYC account under the CKYC, customer/investor will get a 14-digit identification number ("KYC Number") and that the same may be quoted by the investor wanting to invest in mutual funds. Further, the Mutual Fund/AMC is required to check whether the PAN of the investor has been updated in CKYCR. In case the PAN has not been updated, the Mutual Fund/AMC shall collect a self certified copy of the investor's PAN card and update/upload the same in CKYCR.

The address, date of birth and other key information of the investors will get updated from KRA-KYC database or any other KYC database as authorized by Regulators.

In case the Investor uses the old KRA KYC form for updating of any KYC information, such investor shall be required to provide additional/missing information only by using the supplementary CKYC form or fill the new "CKYC form".
